

December 11, 2020

To our Murrysville Community Library community,

Out of an abundance of caution and in light of recent state restrictions related to increased cases of COVID-19, Murrysville Community Library is making the following changes.

Starting Saturday December 12, our building will be closed to the public for one week. We anticipate re-opening with curbside services on Monday December 21.

You may continue to place holds on books and other materials through the patron catalog on our website in anticipation of the library re-opening for curbside service on Monday December 21.

Please continue to return items into our Book Drop, located outside by the front entrance. All items are quarantined for 72 hours before they are checked back in and returned to circulation. If you are returning a Wonderbook or Launchpad, please call the Library to schedule a drop off. Remember that we are auto-renewing all materials and waiving all late fees.

Even though our doors will be closed for one week, we are still here to serve you. Our staff, along with the entire team at the Westmoreland Library Network, continues to provide you with a wide range of online resources, all available through our website. Libby, the e-book interface that makes it easy to browse and check out e-books, e-audiobooks, and even videos, is available and well-stocked for your next great read. If you need a library card to check out e-materials, just follow the link on our website for online card registration.

Looking for a reading challenge? Our library is offering a virtual all ages Winter Reading Challenge through our Beanstack platform. Pre-registration is open now. The Winter Reading Challenge runs from December 21st to March 20th. Help us achieve our community goal of 100,000 minutes read! Sign up by visiting the link on our website, www.murrysvillelibrary.org.

On behalf of the Murrysville Community Library staff and Board of Directors, we are proud to provide you with services, and we thank you for your patience as we all strive for the health and well-being of our community.
